

## **From Region 11 Behavior Specialist**

We wanted to remind you *Promoting Healthy Social Behaviors Initiative* in child care centers remain a valuable resource in your area. HSB is designed to help strengthen children's healthy social behaviors and help solve behavior problems before they escalate, this initiative provides an array of supports to child care centers that serve children who display challenging behaviors and /or those that wish to further develop pro-social behaviors in all children served.

Our focus is to help teachers determine strategies to teach children socially appropriate behaviors; our work partners with teachers to enhance classroom management techniques and promote child-centered learning activities.

We currently have openings to begin work with interested licensed child care center in our region; once the openings are filled remaining centers will be placed on a waiting list for future services. We look forward to hearing from you.
